Supplementary Table S1. Completed SANRA Checklist		
The narrative review was self-appraised using the Scale for the Assessment of Narrative Review Articles (SANRA). Each item was scored from 0 to 2 according to the SANRA instrument.		
SANRA item	**Completed self-appraisal and manuscript location**	**Score**
Justification of importance	The Introduction explains the rapid expansion of GLP-1 RA use and its relevance to aesthetic surgical candidacy, timing, tissue changes, and perioperative care.	2/2
Statement of aims	The final paragraph of the Introduction states the aim and prespecified clinical domains of the review.	2/2
Description of literature search	Material and Methods reports database, dates, language, search terms, manual screening, eligibility criteria, exclusions, and record counts.	2/2
Referencing	Thirty-seven content publications are cited in Vancouver order, with a separate citation for SANRA; key clinical statements and competing findings are referenced.	2/2
Scientific reasoning	Findings and Discussion distinguish association from causality, direct drug effects from weight-loss effects, and direct evidence from post-weight-loss extrapolation.	2/2
Appropriate presentation of endpoint data	Clinical outcomes, biomarker findings, public-interest data, and limitations are presented with study design and direction of effect in Table 1 and the text.	2/2
Total	Completed SANRA self-appraisal.	12/12
